3. The information disclosure statement July 12, 2001 has been reviewed and considered, see enclosed copy of PTO FORM 1449.

Specification

4. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) Cross-References to Related Applications.
- (c) Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).
- (e) Background of the Invention.
 1. Field of the Invention.
 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.

- (j) Abstract of the Disclosure (commencing on a separate sheet).
- (k) Drawings.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 1-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shapiro of U.S. Patent No. 5,668,117 and Brossi et al. of U.S. Patent No. 4,900,748 both in view of the prior art reference of Conte et al. Shapiro discloses of administering acetylcholinesterase inhibitors, such as galanthamine, to treat the neurological disorder of Alzheimer's disease, (see column 4, lines 49-62). Brossi et al. teach of the administration of inhibitors of acetylcholinesterase, like physostigmine, in order to treat Alzheimer's disease, (see abstract). Conte et al. teach the skilled artisan that there is a need for rate-controlled delivery of medication, (see columns 1 and 2 on page 1017).

Art Unit: 1614

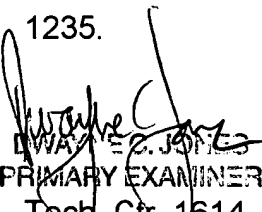

Clearly, it would have been obvious to one having ordinary skill in the art to employ acetylcholinesterase inhibitors, such as galanthamine, to treat neurological disorders, namely Alzheimer's disease, with the teachings of Conte et al. Accordingly, one having ordinary skill in the art would have been motivated to simply administer an inhibitor of acetylcholinesterase in a time dependent dosage manner, especially when the prior art reference of Conte et al. teach the skilled artisan that there is a need for rate-controlled delivery of medication.
